airtight

air permeability up to 6000pa

i am **MOD03**

MOD 03 adds a twist to classic design. Lending the long glazed panel from traditional door designs, 03's bonded glass panel curves at the top and has delicate detailing to frame it.

Great for bringing extra light into dark hallways.

i am **MOD05**

MOD 05 adds a modern twist on traditional glazed panels with its slanted angle that offers a great design feature that looks smart with both straight and curved bar handles.

Another design with dual colour finish on the door panel for a unique door.

i am **MOD04**

An impressive door with lots of design options, MOD 04 offers boundless possibilities for entrances.

The structurally bonded door features an oval shaped glass panel, stylish line details and a dual colour option for lots of colour combination choices.

i am **MOD06**

MOD 06 is really quirky number. The porthole style glass window along with its circle and line detail makes this the Pablo Picasso of the MOD-Series.

Beautifully finished with stainless steel inlay, 05 suits homes that want to make a real design statement.

i am **MOD07**

A design fit for the Tate Modern, MOD 07 is another standout door style with a whole host of options to make it truly unique.

The porthole style window is intersected by strong, straight lines of stainless steel inlayed into the bonded door sash.

i am **MOD09**

Simple, clean and modern, MOD 09 incorporates the very essence of contemporary architecture. A slimline, straight glass section will flood light into the hallway.

Choosing a long, straight bar handle gives the design absolute consistency.

i am **MOD08**

With its subtle design, the MOD 08 door brings metropolitan styling to any home.

Straight lines and square details give an individual look that suits both vibrant and monochrome shades, so you can be as adventurous as you like.

i am **MOD10**

A more intricate design is available with MOD 10.

Taking the straight glass panel design and giving it a twist, the separate sections can be painted any RAL colour whilst the glass design adds extra detail for another dimension.

i am **MOD11**

MOD 11 incorporates four oblong glass panels, so it's the perfect door for bringing lots of daylight into dark hallways.

The design is completed with simple, stainless steel details and a long pull-bar handle. Choose a bright colour for a modern twist.

i am **MOD12**

For a door that's impressive, yet simple and elegant, MOD 12's design is a great choice.

Staggered lines and glass panels give a real contemporary edge to a straightforward design. Keep it classic with modern colours .
