MOD Series

introducing

MOD Series

air MOD Series harmonises aluminium windows and doors into one holistic system, giving homeowners impressive engineering, no matter what aesthetic they choose.

Award Winning Windows & Doors

air MOD Series aluminium windows and doors have been designed to offer you an exclusive range of aluminium profiles that suite with the most impressive bi-fold and lift & slide doors – air 800 bi-fold doors and air 500LS & 600LS lift & slide doors.

air MOD Series includes MOD Contemporary, MOD Heritage, MOD Flush, MOD Tilt & Turn and MOD Doors. Each aluminium window and door has been expertly engineered to offer superior performance and captivating style.

The sleek, slimline frames benefit both the interior and exterior of homes, inviting more natural light inside while providing cutting-edge kerb appeal.

The full range is available in any RAL colour, including dual colour, and can be finished with beautiful handles and impressive hardware to add the finishing touches.

air MOD Series has been exclusively designed with high-performance in mind, offering low U-Values for excellent energy efficiency, thermally insulated aluminium profiles, robust double glazing that can be upgraded to triple glazing and high-security locking systems, certified to Secured by Design, the UK's Official Police Security Initiative.

www.discoverair.co.uk

MOD Series was voted Best Windows at the prestigious Build It Awards confirming its position as the best choice for beautiful windows and doors.

Recognised in the Best New Product category at the G Awards - the glass & glazing industry awards ceremony.

MOD Contemporary Windows

Designed to add luxury and sleek aesthetics, air MOD Contemporary aluminium windows will transform homes in ultra-modern style.

air MOD Contemporary windows feature super slim, sleek aluminium frames that let in boundless light and add captivating style, whilst providing impressive performance benefits.

Aluminium windows are often chosen for the way the slim frames are able to flood homes with light while holding large expanses of glass, thanks to the strong, resilient materials that provide strength and durability to endure the rigors of every day life. The sleek frames are also available in any RAL colour for full design flexibility.

Offering the same impressive aesthetics and performance as air widespan bifold and lift & slide doors means projects can be fully suited with aluminium glazing.

For full peace of mind, air MOD Contemporary windows are PAS 24 and Document Q compliant, and certified Secured by Design.

Also available in French casement opening style.

MOD Heritage Windows

air MOD Heritage windows combine aluminium frames with a steel-look, Art Deco appearance to offer beautiful style, striking the perfect balance between classic and contemporary.

air MOD Heritage aluminium windows are designed to offer modern luxury, as a 21st century replacement for Art Deco style steel windows.

air MOD Heritage windows are an updated design of the classic, Art Deco steel-look window that has stood the test of time. Combining aluminium frames with a heritage appearance offers beautiful style, striking the perfect balance between classic and contemporary.

The slim aluminium frames create a light, airy interior with a beautiful, sleek exterior, and are available in any RAL colour.

Using aluminium frames to offer impressive 21st century performance benefits while maintaining a traditional, period style.

air MOD Heritage allows you to maintain a traditional, period look whilst increasing the performance of your windows using high-performance aluminium frames and superior glazing, creating a stronger, more secure, energy efficient and durable window.

Also available in French casement opening style.

Also available in Heritage Flush - a world-first from air.

MOD Heritage Doors

The 21st century take on Art Deco styling delivers high-end aesthetics.

MOD Heritage Doors take design cues from steel-framed glazing and use energy efficient aluminium frames to create high-performance doors with an architectural aesthetic.

Characterised by steel-look astragal bars, MOD Heritage Doors offer nostalgia and classic style that stands the test of time, perfect for homeowners looking to create a captivating feature.

Heritage doors suit all home types and finishes – classic brick, local stone, white render or even painted walls, bringing elegance and style. New and old, contemporary

and traditional, this heritage styling will never age.

MOD Heritage Doors can be used as a back door, leading out onto the garden – and look stunning when used in conjunction with MOD Heritage windows. For a 'New York loff' aesthetic, choose MOD Heritage Doors as a design feature, creating a wall of Art Deco glazing, with slim sightlines for the natural light to flood through.

air MOD Heritage Doors perfectly blend form and function, offering the high specification standards that the air brand is known for and the luxurious finish that homeowners and architects want from their glazing choices.

MOD Tilt & Turn

air MOD Tilt & Turn aluminium windows offer a feature that's easy to operate and maintain, whilst providing impressive style.

air MOD Tilt & Turn windows have been expertly engineered to offer form as well as function. Easy to operate, clean and maintain, air MOD Tilt & Turn windows have been made with you in mind.

The sleek and stylish windows have been designed to open in ways that suit your needs as they can either turn fully inwards or tilt slightly. Turning the window allows them to be fully opened inwards from the side, for wide openings and easy cleaning.

Tilting the window means the window slightly opens inwards from the top, for ventilation all year round.

The strength and rigidity of the frames means they can hold larger expanses of glass for optimum levels of natural light flooding the indoors. MOD Tilt & Turn windows feature fully concealed hinges and gearing for a minimalist look. Much like the rest of the air range, our tilt & turn aluminium windows are resistant to rotting, warping or fading, and will look stunning for years to come.

Sizes available up to 1400mm (w) and 2400mm (h) for a one pane single opener. Fixed frames are available in large sizes.

Window Handle Options

Sleek, stylish new windows need the perfect finishing touches. The right handle provides the best performance, top security and stunning aesthetics.

Selected with design-conscious homeowners that pay close attention to detail in mind, our handle options add the finishing touches to classic and modern windows.

Our handle range has been designed to provide high-quality and durability. They're fully tested for corrosion and operation so that they look great and work smoothly for years to come.

For an authentic finish, choose heritage hardware such as monkey tail or pear drop handles and dummy peg stays – striking the perfect balance between traditional style and 21st century performance.

Choose from Black, White, Gold, Chrome, Silver and Endurosteel in our standard hardware range, or Antique Bronze, Brushed Copper, Graphite, Black, Rose Gold, Pewter Patina, PVD Gold, Satin Chrome and Polished Chrome heritage hardware options.

Multiple hinges are available for MOD Series, and all options are easy-clean. If you're opting for a larger side-hung opening, a Mega Egress hinge is recommended. The stainless steel hinges can hold greater weights and larger sashes, making them perfect for windows with wider openings. The Mega Egress has been designed for side-hung windows to give them more possibilities. The hinges allow for wide openings so they are also suitable for fire escape windows.

Heritage Handles

Door Handle Options

Stylish and ergonomic door handles that not only look captivating but offer the easiest operation whilst maintaining ultimate security levels for your home.

Designed to offer the perfect finishing touches for your new door, MOD series door handles are available in a range of captivating finishes to match the handles and hardware of your MOD Series windows.

Each handle is engineered, designed and tested to deliver impressive durability, lasting aesthetics and the smoothest operation for years to come.

Our standard handle range suites with the most popular window handle colours and is available in six individual finishes: White, Black, Chrome, Silver, Gold and Brushed Stainless Steel.

For added style you can choose a Pear Drop or Monkey Tail handle from our Heritage Range.

Handcrafted by aluminium experts

air is made in London. We have been manufacturing aluminium products for residential and commercial use since 1980 and have won awards for Manufacturing Business of the Year 2018, 2019, 2020, 2021 and 2022.

Our dedicated team has the knowledge and the skill to create air windows and doors with captivating engineering that carries an industry-leading guarantee.

We use cutting-edge technology and expert skill to create sets of air windows and doors that are truly captivating - all from our state-of-the-art 65,000 sq ft production facility. Manufacturing automation is backed by years of product knowledge and skilled craftsmanship.

Countless hours are dedicated to testing air to ensure that performance is never compromised. This means that we can ensure wind resistance and water resistance are at their optimum and U-values are as low as possible.

Every product we manufacture goes through a strict quality checking process, so air is ready for installation by your Accredited Retailer when it arrives with you.
